Bachelor of Technology in Computer Engineering

July 2019 - May 2023
CGPA - 9.60

Angels English Medium School | Deesa
Gujarat Higher Secondary Education Board

May 2019
Percentile Rank: - 89.00

Angels English Medium School | Deesa
Gujarat Secondary Education Board

May 2017
Percentile Rank: - 99.13

EXPERIENCE

Qubicle AI | MERN Stack Developer Intern | Surat

Dec 2022 - June 2023

- I created a web-based application that facilitates tournament organization, enables collaboration with sponsors, and incorporates a competitive feature for players to engage in tournaments.
- Furthermore, I have implemented Card Views for the tournament page and a popup dialog window to join selected tournaments using the frontend framework **React.js** and **Material UI** library.
- On the backend, I used **node.js** and **express.js** to build **REST APIs**, facilitating communication between frontend and backend systems and implementing various middleware for authentication, logging, and error handling.
- The validated login, events, and players module data is then stored in the **Mongo DB** database.

M Square Technologies | Android Developer Intern | Surat

May 2022 - July 2022

- I developed an E-commerce textile mobile application, enabling brokers to add and sell textile products and customers to easily search and place orders.
- The app uses **Android (XML)** for the user interface, while **Java** serves as the backend to manage API development, database communication, and error handling.
- **PHPMyAdmin** is utilized for storing and managing details of brokers' products and customer orders.

Horizon Techlabs | Android Developer Intern | New Jersey

May 2021 - July 2021

- I developed the "Your Turn" application, which allows students to discover internships based on their preferred location and tech stack.
- The user interface was designed using **Android XML**, and **Java** was used for the backend development, enabling the implementation of essential features such as location and technology filtering.
- The user data, including login credentials, internship preferences, and tech credentials, was stored in **Firebase**.

PROJECTS

Go Grocery || Android Application

- Developed a grocery buying and selling app featuring a GPS-based nearby store display.
- Implemented user store rating and backend features (authentication, search queries, and **Firebase** database management) using **Android XML** and **Java**.

Life shades Hospital || Web Application

- Developed a hospital website for health checkup appointment booking based on user-entered symptoms or diseases.
- Utilized **HTML**, **CSS**, **Bootstrap**, and **JavaScript** for responsive design and integrated **Firebase** for data management.

SKILLS

- **Programming Languages** – C++, HTML, CSS, JavaScript, jQuery, Bootstrap, React.js, Node.js, Express.js, Android, Java.
- **Database** – MongoDB, MySQL and Firebase.
- **Tools** – Visual Studio Code, Android Studio, MySQL, and GitHub.
- **Cocurricular Achievements** – Top SQL 50 Badge, French Language Course
